

Assignment I

Anna Prince

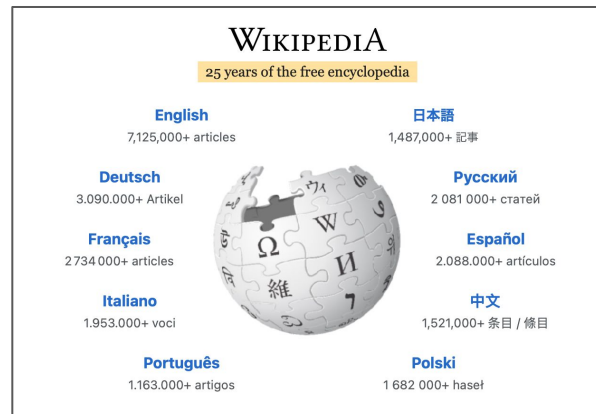

Q1: Databases in my life

Designated research
journal/conference hubs

Race signup &
results platforms

Crowdsourced
information hubs

Proposal	Function	Interface	Existing Example
Database of regional dialects, rarely spoken, or endangered languages.	Facilitate linguistic research for understudied language families or regional dialects.	Search by language or region > similar dialects > speakers for research	Glottolog
Database of neologisms or emerging slang.	Improve auto-translation services or spam/threat reporting. Aid in ethnographic research.	Search by term or community > term meaning > associated communities or dialects > Example usages	Urban Dictionary
Database of understudied language programs	Speed up research participant recruitment or hiring	Search by language, region, or expertise > university affiliation > language focus > other hard skills, etc.	?

Q6: Possible Social Media Tables

“Human-ness”		
Handle	Followers	DMs_Sent
@Real_user	25	3
@Fake_User	4	125

Community Moderation		
Subreddit	Posts_reported	Posts_removed
r/moderated	3	3
r/unmoderated	14	3

“Interesting” posts		
Post	Post_wc	Avg_min_spent_reading
Interesting_Post	300	2
Boring_Post	500	.5

No-SQL versus SQL

SQL	No-SQL
Relational	Non-Relational
Requires consistency	“Eventual consistency”
Row & columns	Diverse formats
Scales vertically	Scales horizontally

2000s: less structured and more diverse data, especially for social media, doesn't suit table format.
